

## Why Cosmetology Schools Need All-In-One Software

Most cosmetology schools already use software like a student information system (SIS) to house student data or a content management system to provide online learning materials. While each software or system serves a unique purpose, cosmetology schools must still rely on manual processes to fill in the blanks. All-in-one software and technology that integrates seamlessly bridges the gap to ensure cosmetology schools remain productive, compliant, and streamlined while offering excellent student experiences.

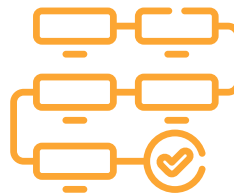

### Cosmetology School Management Software Benefits

**IMPROVE  
PRODUCTIVITY**

**REDUCE  
COMPLIANCE  
ISSUES**

**STREAMLINE  
OPERATIONS**

**BETTER  
STUDENT  
EXPERIENCES**

# Benefits of All-In-One Software

## IMPROVE PRODUCTIVITY

Cut out manual processes to reduce human error and seamlessly input grades, track accreditation hours, schedule clients, and assign jobs. With everything on one system, multi-location administrators can access all their data from a unified location. Say goodbye to data silos and keep a pulse on business operations 24/7.

## REDUCE COMPLIANCE ISSUES

When you have multiple systems, it can be easy to lose track of records or miss critical pieces of information. Maintain verifiable records of attendance and course times with our system that seamlessly integrates your POS system with your SIS. All your student information is in one convenient location.

## STREAMLINE OPERATIONS

If your staff manually tracks attendance, inventory, or other operations, they are wasting valuable time and are more likely to make human errors. Automatically record attendance and track productivity with an integrated, scalable time clock system. Keep your information in sync with back-office systems that track attendance, payroll, inventory, accounting, and financial aid.

## BETTER STUDENT EXPERIENCES

Students want to learn the latest beauty techniques, not deal with dated technology that bogs down the experience. Keep your school modern with technology like kiosks, digital menu boards, and contactless payments. Also, with data stored on one comprehensive system, staff can offer better advising and course assistance, so students always feel supported.

## Additional Features:

- ◆ Online Booking
- ◆ Self Check-In
- ◆ SMS Text Message
- ◆ Digital Menu Board
- ◆ Integrated Payments
- ◆ Mobile Time Clock

*The right technology and software from GuestVision can help your cosmetology school achieve better results.*
